

Slotted strut channel

Slotted strut channel is a structural component used to support or brace piping. It is made by cold formed steel sheet, folded over into an U shape with inwards-curving lips to provide additional stiffness.

- Certificate: ISO
- Standard: Refer to MSS SP-58
- Material: Carbon steel
- Length: 10ft or 20ft, or customized
- Surface: Plain / electroplated / hot dip galv.

Available size

Length (ft)	Thickness (mm) (T)	Size (inch)			Slot dimension (inch)			Ref. No.
		Height (H)	Width (W)	Open mouth (O)	A	B	C	
10	2.7mm (12 GA)	13/16"	1-5/8"	7/8"	1-1/8"	9/16"	2"	P9101
10	1.9mm (14 GA)	13/16"	1-5/8"	7/8"	1-1/8"	9/16"	2"	P9102
20	2.7mm (12 GA)	13/16"	1-5/8"	7/8"	1-1/8"	9/16"	2"	P9103
20	1.9mm (14 GA)	13/16"	1-5/8"	7/8"	1-1/8"	9/16"	2"	P9104
10	2.7mm (12 GA)	1-5/8"	1-5/8"	7/8"	1-1/8"	9/16"	2"	P9105
10	1.9mm (14 GA)	1-5/8"	1-5/8"	7/8"	1-1/8"	9/16"	2"	P9106
20	2.7mm (12 GA)	1-5/8"	1-5/8"	7/8"	1-1/8"	9/16"	2"	P9107
20	1.9mm (14 GA)	1-5/8"	1-5/8"	7/8"	1-1/8"	9/16"	2"	P9108

Note:

1. The thickness can be customized from 16GA to 11GA (1.6mm to 3.0mm).
2. Other sizes and configuration are available.
