

PTFE thread seal tape

PTFE thread seal tape is used onto male threads of metal pipe to assist in rendering joints tight against leakage. This plastic tape is suitable for general pipeline conveying water, gas, petroleum, compressed air, etc.

· Certificate: UL Listed

Standard: UL 1321 / MIL-T-27730AConnection: Threaded NPT / BSPT

W. pressure: 300 psi for pipeColor: White, yellow, etc.

Main parts and material

White	Standard, 100% PTFE (Polytetrafluoroethylene)	Colorful	Optional, min 99% PTFE + max 1% pigment
Spool / cover	Spool / cover Plastic		1

Available size

Tape size (mm)		Length	Density	Color	Max metal	Dof No
Width	Thickness	m	g/cm³	Color	pipe size	Ref. No.
1/2" (12)	0.1	5 ~ 50	0.36	White	1-1/2"	M9401 (UL)
1/2" (12)	0.2	5 ~ 50	0.36	White	1-1/2"	M9402 (UL)
3/4" (19)	0.1	5 ~ 50	0.36	White	4"	M9403 (ISO)
3/4" (19)	0.2	5 ~ 50	0.36	White	4"	M9404 (ISO)
1" (25)	0.1	5 ~ 50	0.36	White	6"	M9405 (ISO)
1" (25)	0.2	5 ~ 50	0.36	White	6"	M9406 (ISO)

Note:

- 1. As UL rule, it is used for metal pipe not exceeding 1-1/2" pipe size in devices handling gasoline, petroleum oils, natural gas (pressure not over 300 psig), propane and butane.
- 2. Other size and color are available as customer request.
