

# Eye rod

Eye rod is a round steel bar with machined threads on its partial length at one end, and with an oval eye at the other end. It is used to connect pipe clamp or riser clamp to make up a pipe hanger assembly.

- Certificate: ISO
- Standard: MSS SP-58, GB/T 17116.3
- Type: Single head threaded eye rod, open or closed type
- Material: Carbon steel
- Surface: Plain / Electro-galvanized
- Application: Ideal for applications where longer threaded rod is not needed
