

Pipe vise

Pipe vise is a manually operated clamping device mounted firmly to the edge of a sturdy workbench. It is used to securely grip pipe and other workpieces, preventing movement or rotation during operations, thereby ensuring operational safety and precision.

- Certificate: ISO
- Standard: QB/T 1558.1
- Material: Ductile iron base and frame, high carbon steel jaw with hardness HRC 50-60
- Temperature: Workpiece no more than 300°C
- Surface: Red painting, or customized color

Available size
